

Exploring Disorders of Language – Identification and Differential Diagnosis

At least 1
child in every
classroom

Monday 23rd May 2016

9.30am - 4.30pm

Lecture Theatre, Centre for Health Sciences,

Raigmore Hospital, Inverness

More
common
than ASD?

You are invited to join a study day led by Maggie Johnson; speech and language therapist advisor specialising in childhood communication disorders, contributor to the DSM 5 and author of various manuals and practical resources, to explore:

- What is Language Disorder?
- What are the similarities and differences between language disorder, autistic spectrum disorder, specific learning disorder (dyslexia) and developmental co-ordination disorder (dyspraxia)?
- Why do so many children with speech, language and communication difficulties go under the radar?

To book contact Joanne Lewin, SLT on 01463

705424 or joanne.lewin@nhs.net

Book now to secure your place.

Lunch is not provided but is available to purchase at the onsite café.

Free to attend
